

the jimibeat lyrics

my life

words by s. + c. csillag, music by the jimibeat

that fine quiet moment, i look into different skies
start to think about my life, then i close my eyes
awake my memories, and i realize at first view
there were days of joy, but there were hard times too

it's my life i love to live
there's noone i'd rather be
the more i learned, the less i know
come on, relax and let it grow
just your own way makes you feel free.

thought i knew everything, but life's a big surprise
gives what you don't expect, a lesson in disguise
and when i thought „i got it“, life tripped me up
but when i let things slide, it cheered me up

it's my life i love to live
there's noone i'd rather be
the more i learned, the less i know
come on, relax and let it grow
just your own way makes you feel free.

i searched for answers in my own childrens eyes
in embracings with their mother, in hugs with other guys
took years to find, the questions was useless to be asked
all answers inside me, luck sometimes is masked

it's my life i love to live
there's noone i'd rather be
the more i learned, the less i know
come on, relax and let it grow
just your own way makes you feel free.
