

the jimibeat lyrics

summer is over

words by c. csillag, music by the jimibeat

again you left me, now i resigned
no chance to understand your twisted mind
seems to me, for you it's just an easy play
a hollow promise, when you told me, that you would stay

summer is over, over and out
don't need you prick, i have no doubt
you played your game without any shame
now take all the blame and don't come back again

your mendacity i can't stand nomore
delusion is not what i was searching for
i had a dream, now all our plans went wrong
but in the end your weakness gonna make me strong

summer is over, over and out
don't need you prick, i have no doubt
you played your game without any shame
now take all the blame and don't come back again

again you left me, now i resigned
nomore need to stand your twisted mind
nomore words like „I will stay“
that hollow promise, of a runaway

summer is over, over and out
don't need you prick, i have no doubt
you played your game without any shame
now take all the blame and don't come back again
